MY GOALS

I'm looking for an organization with a positive work environment, motivating projects, great benefits, and a healthy work-life balance. I want to be challenged, learn new technologies, and contribute by sharing my experience.

WORK EXPERIENCE

Nazaries Intelligencia (2021 – at present)

Backend Software Developer Sr

I have been working as a Back-end Ruby on Rails developer, using the full Rails stack and gems like Devise, RSpec, and JWT. I have experience with background jobs (Sidekiq, Redis) and enjoy building REST APIs, with interest in learning GraphQL. Additionally, I have led a team of four developers, including juniors and a semi-senior.

Hogarth Worldwide (2019 – 2021)

Full Stack Developer

I worked as web development for clients as Mastercard, Directv, Bimbo, AXION y Novartis. I've have worked in whole software development life cycle, the front end (Bootstrap 4 y jQuery), the back end (PHP, Drupal) and the deployment in AWS.

Universidad del CEMA, (2013 - 2019)

Software Development Engineer

I developed web applications for managing students, teacher salaries, and university exchanges, as well as a university website using tools like PHP, JavaScript, MySQL, Oracle, and frameworks like CodeIgniter and Drupal. My role covered the full development lifecycle: requirements gathering, analysis, design, database management, implementation, and testing.

FREELANCE EXPERIENCE

As a freelancer with over 10 years of experience, I developed skills in business management, marketing, communication, and budgeting, while working as a web developer. I used PHP, MySQL, JavaScript, and frameworks like Laravel, Symfony, and CodeIgniter, deploying projects with Git or Rsync on platforms like GoDaddy and Donweb. Some of my projects include:
