ADRIÁN MATÍAS MAGLIOLA

Software Engineer & Web Developer

(054 11) 6293.0006   adrian.magliola@gmail.com   Bs. As, Morón   Argentina

ABOUT ME

If your are looking for a software engineer with more than 14 years working as web developer, maybe I can help you. I'm Adrian and I've been working for 2 years in a Spanish Software Company; furthermore, I've been working as freelance developer for about 10 years.
I could talk about the technologies that I've already known, but I think that my best strengths are both communication and my ability to make good relationships with customers and partners.

SKILLS

Laravel, PHP & Vue

Drupal 8

Ruby on Rails

Mysql, Oracle, MariaDb

Linux

Docker

HTML, SaSS & JavaScript

GIT

English

API Rest

WORK EXPERIENCE

Nazaries Intelligenia (2021 – at present)
Backend Software Developer Sr

The lasts years I've started to work as Back end RoR developer using all the stack of tools provided by Rails: active records, migrations, views, controllers and testing. I've used several GEMs as Devise, Rspec, JWT, Rubocop, Pundit, Byebug, etc and ,also , I've some experience working with delayed jobs using Sidekiq and Redis.

Hogarth Worldwide (2019 – 2021)
Full Stack Developer Sr

I worked as web development for clients as Mastercard, Directv, Bimbo,AXION y Novartis. I've have worked in whole software development life cycle, the front end (Bootstrap 4 y jQuery), the back end (PHP, Drupal) and the deployment in AWS.

Universidad del CEMA, (2013 - 2019)
Software Development Engineer Sr

I developed several web applications using: Linux, PHP, Javascript, Oracle, PL/SQL, jQuery (jQuerys Plug-in: Validation, DataTables, Grocery CRUD, Google Maps, jQuery UI, etcétera), Codeigniter, JSON, MySQL, Bootstrap, HTML5 and GIT. My developments:

- CRM: the application helps managing new potential students.
- SITECO: the software helps paying university teachers salaries.
- SINTAL: the application helps managing students exchanges with other universities
- WEB UCEMA: created using Drupal, PHP, Oracle and API REST In all applications.

I've developed: requirements elicitation, requirements specification, analysis, design, data base, implementation and testing.

Ministry of Economy of the Argentine Republic (2005 – 2013)
Technical support and development

I've been working as technical support , networking and programmer Jr (Native PHP, JavaScript and Mysql). Maintaining the application and hardware support.

FREELANCE EXPERIENCE

As freelance I had the opportunity to development another kinds of skills: business, marketing, communication and budgets.
I've been working as Web Developer for more than 10 years using: PHP, MySQL, Javascript, Bootstrap, JSON, CSS and JQuery. I used frameworks as Laravel, Symfony and Codeigniter and make the deployment using Git o Rsync in virtual hosting as Godaddy and Donweb.
